→ *épuri Hydro-Balancing Moisturizer*

The *épuri Hydro-Balancing Moisturizer* has harnessed the power of water in a form that can easily be applied to your skin for the best moisture delivery out there. Because it is a water-based moisturizer, you aren't putting anything into your skin that shouldn't be there. As you slowly apply the moisturizer, you will actually see water droplets forming.

→ *What Makes Our Moisturizer Superior*

épuri Hydro-Balancing Moisturizer helps to prevent early aging, dryness and wrinkles in skin by harnessing the power of water. This groundbreaking formulation feels as cool and refreshing as simply washing your face. While still providing all the benefits of a high-end moisturizer. Here are some key ingredients that make this moisturizer superior to others.

>> **HYDRACTIN®** - Stratum Corneum is the outermost layer of the skin. This layer controls the moisture of skin and serves as an important barrier function by keeping molecules from passing into and out of the skin. Hydractin® work with startum corneum layer to supply moisture and energy for the skin. Also, the polysaccharides derived from brown algae help to reduce trans-epidermal water loss by means of their film-forming properties. Papaya supplies glucosides, trace elements and the enzyme papain, which contributes to improved absorption of the active ingredients through its keratinolytic activity

>> **SODIUM HYALURONATE** - sodium hyaluronate has excellent ability to keep moist in skin for a long time. Our bodies have the natural potential to produce Hyaluronic Acid for moisturization and joint lubrication. As we age, however, the natural creation of Hyaluronic Acid decreases. One of the most important biological functions of Hyaluronic Acid is its capacity to hold more water than any other natural substance. Thus, Hyaluronic Acid performs as an unbeatable moisturizer, while protecting, hydrating and regenerating your skin.

>> **CENTELLA ASIATICA EXTRACT** - Centella asiatica extract have modulating properties on the development and metabolism of connective tissue, improve the synthesis of collagen and other tissue proteins by modulating the action of fibroblasts in the vein wall, and stimulate collagen remodeling in and around the venous wall. Clinical trial shows that centella asiatica extract has ability to promote heal wounded scar tissue and has antibacterial, anti-psoriatic properties.
