→ *épuri Nourishing Multi-Protection Moisturizer*

In today's world, even young skin needs help in order to keep looking young and beautiful. Factors such as stress, pollution, and even not getting enough sleep can knock skin out of balance; the good news is that *épuri's Multi Protection Moisturizer* has been specially formulated to combat the source of these problems in order to give you younger and more radiant looking skin. It does all this without leaving a heavy or greasy feeling behind. You may forget you've even used a moisturizer until you get used to this light, clean feeling.

→ *What Makes Our Moisturizer Superior*

épuri Everyday Nourishing Multi Protection Moisturizer helps repair the appearance of past damage and protect skin's future. To accomplish these results, the *épuri Nourishing Multi Protection Moisturizer* uses a number of powerful, emollients and moisturizers such as butylene glycol, glycerin, propylene glycol, and jojoba oil to deeply moisturize the skin. Like the other products in the *épuri* family, it also uses high amounts of DMAE, alpha lipoic acid, and green tea to promote healthy, youthful skin and protect your skin from environmental elements that threaten to produce wrinkles.

>> 6 different peptides and antioxidant to re-build protein in skin.

>> JOJOBA OIL is an effective moisturizer and skin softener. Jojoba oil holds moisture in the skin and restores the skin's natural defenses

>> GREEN TEA EXTRACT boosts protective antioxidant action to help prevent free radical damage and detoxify your skin.

>> ADENOSINE is an organic compound of adenosine that is formed by hydrolysis of yeast nucleic acids. All living things need a continual supply of energy to function. Animals obtain energy by oxidizing food. Plants obtain energy by chlorophyll's interaction with sunlight. However, before energy can be used, it must first be changed into a form that the organism can readily use. This special carrier of energy is the adenosine triphosphate. Study has shown that this process helps collagen production and reduction of wrinkles.
